

E-2 INVESTMENT VISA GUIDE

Our
platform

Business Analysis

Business Evaluation

Business Plan

Our E-2 Investment Visa platform is focused on launching you with sound business analysis to evaluate & maximize the success of your E-2 Visa application. We provide business consultations that identify different capitalization options to invest in the enterprise.

We look at the capitalization of the enterprise from a business standpoint. Although the initial investment into the United States which quality's as

“significant” for purposes of the E2 Visa is \$100,000, the actual participation of the investment into the business is not mandated by the visa but rather by sound business practices. As such, different financial capitalization instruments can be used to secure assets to start a business or acquire a business:

- If machinery will be an essential part of the business, we will discuss leasing the equipment.
- If retail presence is required for the business, we will discuss lease/purchase, rental or outright purchase via mortgaging the property.
- For furniture and fixtures, we will discuss both rental and lease.
- For technology equipment, we will discuss outsourcing, lease/purchase or rental.
- For transportation equipment, we will discuss rental, lease/purchase or outsourcing.

Our strategy is to have you utilize the money that enters into the U.S., for the purpose of the E-2 Visa, as a leverage instrument to get to the necessary business assets. We believe that conventional business options like leasing, mortgaging and or renting are often overlooked in developing the business plan by other Immigration attorneys consulting clients on E-2 Visas.

We look at your investment into the U.S. separate from how you use that investment to successfully start or run a business in the U.S. Ultimately what is approved is the success of the business regardless of how you used your U.S. capital infusion. Our E-2 business program is what separate us from other Immigration Law Firms.

Our E-2 Investment Business team of dedicated and talented professionals are at your disposal and will guarantee that our E-2 Investment Visa platform captures the essence of what you want from your E-2 Visa application.
